5

Profile and Skills

As motivational leader I'm eager to encourage individuals and teams to exceed their own expectations. I believe that this will result in unexpected returns for a company. My objective is to make myself unnecessary through empowerment of people and bridge building. Companies with a clear mission, employee focus and a transparent business culture are matching with my understanding of doing business.

6

Experience in developing countries

Throughout the past decade I've gained significant experience with working in developing countries. I've managed a steel profiling company in Ethiopia with over hundred employees and travelled frequently to other African countries like South Sudan, Burundi, Tanzania etc. for various assignments.
